

Network of environmental observers of the Gaià River - XOAG

- XOAG is a participatory and collaborative project for the conservation of biodiversity and natural habitats in the Gaià river basin.
- It aims to create a voluntary, proactive and interconnected network of environmental observers who want to be involved in different projects and proposals of general interest.
- Associació Mediambiental la Sínia coordinates and facilitates the activity of XOAG with the support of local administrations.
- XOAG is open to any interested people.

Network of environmental observers of the Gaià River
